Your monthly update on our Mutual Fund Schemes

Oct 2026

(Details as on 30th Sept 2026)

Nippon India Mutual Fund

Wealth sets you free

Set Sail with the Power of 3

With the right mix of assets, steer through any market condition effortlessly.

Presenting

Nippon India Multi Asset Allocation Fund

Markets are unpredictable, and different asset classes react differently to changing conditions. That's why it's essential to have a balanced mix of Equity, Debt, and Commodities. The Nippon India Multi Asset Allocation Fund strategically diversifies your investment, helping you stay invested across asset classes and aiming to optimize risk-adjusted returns.

What the fund offers:

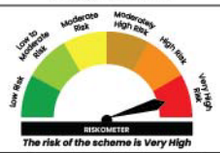

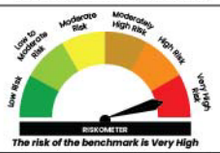

Diversified Portfolio:
Invests across multiple asset classes for diversification

Performance:
Seeks to deliver optimal returns by balancing risk and reward

LTCG:
LTCG holding period now reduced to 24 months, taxed at 12.5% **

MARKET UPDATE

High Crude, Global Central Bankers' Pivot towards, Monetary Tightening and Spike in UST

September'26 saw sharp rise in geopolitical tensions, jump in crude and commodity prices, spike in UST (with 10 yr UST at record levels), rising inflation concerns resulting in pivot of global central bankers towards monetary tightening.

Back home, Monsoon ended with 13% deficit with rising concerns about super El Nino impact extending into winter season. Aug'26 Inflation print closer to 5%-mark, pivot of major central bankers towards rate hike cycle and spike in global yields has resulted in start of rate hike cycle in India in its early Oct'26 policy.

India:

Monetary Policy: RBI hiked the policy rate by 25 bps to 5.5% (in line with consensus expectations) and changed its stance of 'Neutral' to 'Calibrated Tightening' indicating next action is likely to be hike or pause. That said, the RBI clearly indicated that the forthcoming actions were be data dependent. RBI revised upward FY27 inflation and growth projections.

Inflation: Aug'26 CPI inflation rose to 4.82%y/y (Jul 2026: 4.45%y/y; Consensus: 4.9%y/y). The rise in monthly print (0.73% m/m) was driven mainly by broad-based pick-up in food prices (seasonality & lower rains), restaurant prices, telecom hike and gold prices. Core inflation (excludes petrol and diesel) rose to 4.17%y/y (Jul 2026: 3.9%y/y; Avg Apr-Aug 2026 ~3.9% y/y), while the Core-core inflation (excludes gold) rose to 2.9% y/y (Jul 2026: 2.64%; Avg Apr-Aug 2026 ~2.5% y/y).

Fiscal: Apr-Aug 2026 Fiscal deficit rose to ~42% of BE FY27 (Previous year: ~38%). This was primarily due to buoyant expenditure growth (revenue expenditure excluding interest and capex), while revenue receipts growth was modest. That said, the non-debt capital receipts (Read: Disinvestment) has accelerated with the government already achieved ~64% of budgetary target. On sources of funding fiscal deficit, YTD small savings and Others' collections continued to remain robust. The govt continue to hold robust cash balances since May indicating comfortable funding position. On subsidy front, all the three main subsidy expenditure are growing at robust double digit, with ~two-third of budgetary requirement completed in fertiliser & fuel subsidy, while one-third completed in food subsidy (seasonality).

Foreign Trade: In August 2026, the trade deficit continued to remain elevated at ~US$27 bn, although it moderated from record ~US$32 bn in July. While exports (Oil and core) have been robust since start of the current fiscal, imports (oil and core imports) have accelerated in double-digit. During Apr-August 2026, both exports (oil & core) and imports (oil and core) grew double digit on the annual basis. During similar period, the net services exports were modest at ~7%y/y (Previous year similar period: ~17%y/y).

FCNR Deposit led FX Flows: RBI garnered US$143 bn during Jun-Sep through swap window for NRI deposit led FX flows. This has led to sharp rise in deposit, humungous system and durable liquidity and improvement in INR and BoP outlook.

Liquidity: After accelerating to monthly avg ~Rs. 3.7 trn in August 2026 (average Jun/ Jul: ~Rs. 1 trn), the banking system liquidity rose sharply to avg ~Rs. 7.8 trn (~3% of NDTL) driven by record flows in FCNR deposits. Peak daily liquidity surplus was witnessed during the first week of Sep at ~Rs. 11 trn. That said, the RBI undertook various measures to suck out the excess liquidity (long maturity VRRRs, OMO sale and US$ Sell/buy swaps). In fact, the RBI aggressively suck out Rs. 1 trn through OMO sales during second half of September.

Foreign Flows: After three consecutive months of positive flows, September witnessed FPI outflows (US$6 bn), primarily driven by global cues (escalating geopolitical uncertainties, elevated U.S. bond yields, higher crude oil prices, and capital shifting toward AI-heavy markets like South Korea and Taiwan). YTD FPI outflows in the calendar year 2026 stood at US$22 bn driven primarily by equity (~US$28 bn) as against overall outflow of US$12bn in CY25.

Currency: After appreciating by ~0.4% in Aug (aided by FCNR deposit flows), INR was stable in Sep 2026 on dollar depreciation. That said, the second fortnight of the month witnessed pressure on INR (~1%m/m) driven by strong dollar, spike in UST, sharp rise in crude, rise in geo-political uncertainty. YTD Calendar year 2026 INR has depreciated by ~7% driven primarily by the sharp rise in geopolitical concerns and strong dollar (~3% YTD appreciation).

Fixed Income Market Update- Yield Levels & Spreads: G-sec yields rose sharply in September (especially in second fortnight of the month) on rate hike by US Federal Reserve, spike in US treasury yields (UST), sharp rise in crude prices, OMO sales and hawkish RBI minutes. 10 yr G-sec yields moved in the range of 6.94-7.19% (August range: 6.76%-6.95%). It closed the month higher at 7.19% (Jun 2026: 6.75%, Jul 2026: 6.83%; Aug 2026: 6.95%).

Taking cues from G-sec, the SGS (State Govt Securities) yields moved up during the month, while the monthly primary supply remained robust (~Rs. 1.1 trn). 10-year SDLs moved in the range of 7.62%-7.87% (Prior month: 7.40%-7.64%). It closed the month higher at 7.85% (Jun 2026: 7.40%; July 2026: 7.45%; Aug 2026: 7.64%). The average spread between 10 yr SDL over G-sec stood at 68 bps during the month (Jun 2026: 70 bps; July 2026: 66 bps; Aug 2026: 63 bps).

Similarly, 10-year AAA bond yields moved higher in the range of 7.75%-7.95% (Prior month: 7.45%-7.77%) and closed the month higher at 7.94% (June 2026: 7.38%; July 2026: 7.48%; Aug 2026: 7.77%).

Global:

Financial Markets: The UST yields rose sharply in Sep on hawkish US Federal Reserve Policy, jump in crude oil prices and rising inflation concerns. 10 yr UST moved in the range of 4.77-5.29% (Aug 2026: 4.63%-4.75%) and close the month higher at 4.29% (Jun 2026: 4.44%; July 2026: 4.75%; Aug 2026: 4.75%).

In Sep, DXY depreciated by avg ~1.1% m/m (Aug 2026: -ve 0.63%). That said, it appreciated in second fortnight of the month by 1.7%. Calendar year till date the DXY has appreciated by ~3.2%.

After appreciating sharply by 8.7%m/m in August, the crude oil accelerated further by ~25% m/m in Sep 2026. The average crude oil rose to ~US$114/ barrel (bbl) (Aug 2026: 91/bbl).

Indian Fixed Income Market- Future Outlook:

- Monsoon deficit, broad-based increase in food prices, high global commodities have raised inflation concerns globally and domestically. Further, the major central bankers' have pivoted to rate hike cycle and there is sharp rise in global yields since Sep'26.
- Against this backdrop, the RBI hiked the policy rate driven primarily by the early signs of generalisation of inflation and elevated inflation expectations. While the action was the first step towards recalibration, there exist upside risk to inflation outlook from deficient monsoon, ongoing El Niño conditions and high energy & other commodity prices (amidst global geopolitical uncertainty).
- While the rate hike in the policy was in line of expectations, the calibrated tightening stance has removed the case for shallow hike cycle. While the record Foreign Currency Non-Resident (FCNR) deposit mobilisation has resulted in record high forex reserves, the RBI has been conducting sell-buy Foreign Exchange (FX) swaps to reduce record high outstanding short FX swap position and domestic liquidity.
- With banking and core system liquidity at record high levels, the RBI may likely to use various measures to suck out excess liquidity (Variable Reverse Repo Rate [VRRR], Sell-buy swaps, Open Market Operations [OMOs] sales etc)
- Going forward, IGB (Indian Govt Bonds) are likely to take cues from RBI policy actions and statements, global policy rates and global yields, apart from evolving crude prices, food and underlying inflation.

GLOBAL MACRO & MARKETS

India's NSE NIFTY 50 Index ended the month of September 2026 in red (-6.1%). Among major global indices, the Japanese NIKKEI (+0.7%), Morgan Stanley Capital International (MSCI) World (-1.3%), the Euro 50 (-2.40%) and the S&P 500 (-0.5%) ended the month of September 2026 with negative returns. Performance was mixed among Emerging Market (EM) indices in September 2026, with the MSCI EM, Hang Seng, BOVESPA Brazil recording returns of (-0.8%), (-3.7%), and (+5.0%) respectively.

The London Metals Exchange (LME) Metals Index was down (-0.7%) in September 2026. West Texas Intermediate (WTI) in green MoM, by (+5.4%) and Brent Crude positive MoM, by (+14.4%), respectively, as markets remained cautious given geopolitical uncertainty.

The Dollar Index climbed by (+2.0%), through September 2026, with the US Dollar (USD) is neutral vis-à-vis Emerging Market (EM) currencies (-1.5%) and depreciating marginally against the Indian Rupee (INR) on the spot market (+0.7%). Bond yields moved upwards, with India's 10Y G-Sec yields gained by 24 bps, while US 10Y G-Sec yields climbing 54 bps, and the German Bund yield rose by 26 bps, with rates settling at 7.18%, 5.28% and 3.59%, respectively.

DOMESTIC MACRO AND MARKET

The BSE SENSEX decreased (-5.8%) in September 2026, in line with the NSE NIFTY Index. The BSE Mid-cap index & the BSE Small-Cap index, falling by (-6.6%) & (-1.8%), over the month of September 2026, respectively. All major sectoral indices ended the month in negative territory. IT, auto and realty indices declined the most (-11%), (-9%) and (-6%).

Net Foreign Institutional Investors (FII) flows into equities were negative for September 2026 at (-$ 4.1 Bn), following ($2.963 Bn) in August 2026. Domestic Institutional Investors (DIIs) remained net buyers of Indian equities for the 38th consecutive month with flows of (+$8.0) Bn in September 2026 compared to (+6.1Bn) in August 2026.

India's high frequency data update:

Manufacturing PMI eased to its lowest level since August 2021, while GST collections remained robust, supported by a sharp rise in import revenue. Core-sector output and industrial production rebounded, and credit growth accelerated marginally. However, inflation edged higher-CPI rose to 4.82% YoY in August from 4.45% in July, with food inflation at 5.95%- and the merchandise trade deficit widened to $31.98 billion in July, before narrowing to $26.86 billion in August.

- **Purchasing Managers' Index Manufacturing PMI:** India's Manufacturing PMI rose to 55.1 in September 2026 from 52.8 in August, revised down from a preliminary estimate of 55.7, but marking one of the strongest improvements in the sector's health in seven months. New orders increased at their fastest pace in seven months, while output growth accelerated to a four-month high, supported by firmer demand for electronic, food, pharmaceutical and textile products. New export orders also expanded at a quicker pace, with stronger demand from Brazil, Europe, the UAE and the US.
- **Goods and Services Tax (GST Collection):** Gross collections of INR 1.77 Tn (+14.7 % YoY) in September 2026 the Gross Domestic Revenue stood at Rs 1.25 lakh crore, rose (+10.1% YoY), while Gross Import Revenue stood at Rs 0.520 lakh crore, marking a sharp rise of (+25.9% YoY) during the month.
- **Core Sector Production:** The index of eight core sector industries grew moderately (+4.8% YoY) in August 2026, against a (+5.0% YoY) growth in July 2026. The production of Electricity, Cement and Steel recorded growth in June 2026. The production of Cement, Electricity Iron Ore, Steel and Refinery products recorded growth in August 2026 by (+12.5% YoY), (+11.6% YoY), (+5.5% YoY), (+3.4% YoY), (+2.6% YoY) respectively.
- **Industrial Production:** Factory output growth as measured by the Index of Industrial Production (IIP) grew YoY by (+8.0%) in August 2026, vs a growth of (+6.7%) YoY in July 2026. The growth rates of the sectors, Mining & Quarrying, Manufacturing, Electricity & Gas Supply and Water Supply, Sewerage & Waste Management for the month of August 2026 are (- 5.6%), (+9.0 %), (+12.3 %) and (+6.3 %) respectively.
- **Credit growth:** Scheduled Commercial Bank Credit growth in September 2026 increased marginally to (+18.8 %) YoY vs (+18.3%) YoY in August 2026. Agriculture and allied activities credit in August 2026 grew by (+17.2%) YoY, while industrial sector credit grew by (+18.2%) YoY, the services sector credit grew by (+24.3%) YoY.
- **Inflation:** For August 2026, the Consumer Price Index (CPI) inflation rate rose YoY to (+4.82%), up from (+4.45%) in July 2026. Food inflation accelerated further to (+5.95%) YoY, compared with (+5.52%) in July. The Wholesale Price Index (WPI) inflation in August 2026 was at around (+9.92%) YoY, compared with (+9.78%) YoY in July 2026. The higher inflation rate in August 2026 was primarily driven by food prices, fuel and power, and broad-based increases across most CPI categories; notably, onion inflation rose sharply to 48.27% YoY, while fuel and power inflation at the wholesale level increased to 22.93% YoY. Deflationary trends were observed in items such as tomatoes, potatoes, and some primary articles, although these were insufficient to offset the broader inflationary pressure.
- **Trade Deficit:** Indian merchandise exports increased by (+26.1%) YoY to $43.81 billion in August 2026, compared with $34.74 billion in August 2025. Merchandise imports rose at a slower (+14.1%) YoY pace to $70.67 billion, versus $61.96 billion a year earlier. Consequently, India's merchandise trade deficit narrowed to $26.86 billion in August 2026, from around $27.2 billion in August 2025 and $31.98 billion in July 2026

Market Outlook:

- Global macro conditions remain volatile, with crude oil prices, interest rates, commodities and currencies continue to remain elevated.
- On the domestic front, trends remain encouraging. Consumption has recovered following the GST rate changes, while government-led investment remains supportive and private-sector capex continues to improve from a relatively low base.
- Corporate earnings have also shown signs of improvement, with revenue and earnings growth moving into double digits. Q1 FY 27 quarterly results were ahead of expectations, providing greater confidence in the earnings recovery.
- FII selling had started to moderate after significant outflows in the first seven months, but renewed geopolitical tensions and higher crude prices may keep foreign flows volatile. Foreign Currency Non Resident (FCNR) flows have provided some support to the currency, though they do not address the structural impact of higher energy costs.
- Domestic liquidity remains an important support for equities, with SIP flows continuing at healthy levels. However, a prolonged period of market weakness could have some impact on the pace of incremental flows.
- At the same time, strong primary-market activity through IPOs and offers for sale is absorbing significant liquidity. Continued supply of new paper could keep a lid on the pace of market recovery in the near term.
- Valuations have become more reasonable following the time correction in Indian equities, particularly in large caps. This has potentially improved the risk-reward compared with the elevated valuations seen earlier.
- Going forward, earnings growth may be an important driver of market returns, particularly as valuations have become more reasonable and the market navigates external uncertainties around crude oil, geopolitics and global interest rates.
- India remains vulnerable to elevated crude oil prices given its dependence on energy imports. A sustained rise in crude could create a dual impact through pressure on the currency as well as corporate earnings.
- Overall, while near-term volatility could persist, improving domestic earnings, resilient consumption and investment trends, healthy domestic flows and more reasonable valuations may remain supportive. We might remain constructive on Indian equities from a medium- to long-term perspective.
- Asset allocation in line with the risk appetite of the investor is an important tool to navigate any unanticipated volatility. Accordingly, Large Cap & Large Cap oriented diversified strategies along with hybrid funds might appear to be better placed on risk-reward basis, while Mid/Small cap allocation may be considered in a staggered manner through systematic investment with a long-term view.

Events to Watch Out For in October 2026:

RBI MPC (October 5–7): The RBI's Monetary Policy Committee meets from October 5–7, with the repo-rate decision due on October 7 at 10:00 AM IST. Markets will watch whether the RBI holds the repo rate at 5.25% or hikes it, amid elevated inflation and global tightening; the Governor's press conference at 12:00 PM may be key for liquidity and forward guidance.

Domestic Macro Data: August CPI is due on October 12, WPI on October 14, and September IIP on October 28. These releases could shape expectations for the inflation trajectory, industrial recovery, and RBI policy stance.

Global Cues: US Federal Open Market Committee (FOMC), crude oil prices, US bond yields and major technology earnings will remain important for FII flows, IT-sector sentiment, and Indian bond markets.

Domestic Compliance: The tax-audit report deadline has been extended to October 21, while the ITR deadline for tax-audit taxpayers has been extended to November 21. Other changes effective October 1 include revised bulk-deposit rate disclosure rules, a new UPI MDR framework for specified transactions above Rs 2,000, and biometric Aadhaar authentication for subsidised domestic LPG refills.

Gold & Silver Outlook

Gold and silver have both corrected from recent highs after a strong rally, but the medium to long term investment case may remain constructive. Our view is that volatility may remain elevated at least until the year end. Higher interest rates and bond yields may remain a headwind, while portfolio diversification, hedging demand, fiscal concerns and tight physical markets may provide support.

For gold, the key structural development is its resilience despite higher global bond yields. Traditionally, rising real yields have been negative for gold, but this relationship has weakened since the pandemic. One explanation is that higher yields are increasingly reflecting higher term premiums and concerns around fiscal sustainability, rather than only stronger growth or tighter monetary policy. With global debt continuing to rise and limited visibility on fiscal consolidation, gold's role as an asset without direct credit risk becomes increasingly relevant.

Physical gold demand in India is currently softer, particularly in jewellery and small bars, as higher prices affect price sensitive consumers. However, such periods have historically also created greater interest in financial gold, including ETFs. Gold and silver ETFs remain a small part of India's much larger physical precious metals market, leaving room for further financialisation.

Silver shares many of gold's monetary and diversification characteristics but has an additional industrial demand component. This could make silver structurally attractive, but also more cyclical and volatile. Demand from solar, electronics, electrification and other industrial applications potentially remains an important long term support. At the same time, silver may potentially underperform gold during periods of weaker global growth and typically relatively larger price swings in both directions.

From a portfolio perspective, gold could remain the core precious metals allocation because of its diversification characteristics and relatively lower volatility. Silver may have potential to complement gold as a higher beta exposure to both, precious metals and industrial growth.

For investors, the focus might remain on strategic allocation rather than short term market timing. Given the likelihood that volatility remains elevated, staggered allocation might be preferable after large price moves. Based on historical experience, a minimum investment horizon of two to three years may appropriate, with a longer horizon for silver given its higher volatility.

Overall view: the structural case for both metals remains intact, but the path is unlikely to be smooth. Gold may remain supported by high global debt, changing bond market dynamics and diversification demand, while silver might benefit from the same monetary backdrop with additional support from structural industrial demand.

Note: Market scenarios are not reliable indicators for current or future performance. The same should not be construed as investment advice or as any research report/research recommendation.

Past performance may or may not be sustained in future.

Nippon India Large Cap Fund

The scheme returns are inclusive of the impact of segregation of portfolio. For complete details, please refer SID/KIM of the Scheme.
Segregated Portfolio 1 - Impact of segregation on NAV is negative (0.56%). An amount of 4.30% of total exposure realized on Sep 16, 2020. The annual coupon amounting Rs 6.98 cr received on Jan 27, 2021. Entire due amount of Rs 93.78 Cr (Face Value + Accrued Interest) was received on January 27, 2022, subsequently all the units in this segregated portfolio were redeemed and the portfolio was closed, and the investors were duly paid in proportion to their holding.
Segregated Portfolio 2 - No impact of segregation on NAV beyond fair valuation of securities done on March 5,2020.

Details as on September 30, 2026

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.
It is assumed that a SIP of ₹10,000 each executed on 10th of every month including the first installment. Load has not been taken into consideration.
Returns on SIP and Benchmark are annualised and cumulative investment return for cash flows resulting out of uniform and
regular monthly subscriptions have been worked out on excel spreadsheet function known as XIRR.

Brief on New Securities included in the Portfolio of Debt Funds

GMR Hyderabad International Airport Limited (GHIAL)

Rated: AA+/A1+ by ICRA, India Ratings and CRISIL

GHIAL operates the Rajiv Gandhi International Airport, at Shamshabad, in Hyderabad. It commenced commercial operations on March 23, 2008. The company's sponsors include GMR Airports Limited (74% holding), Airports Authority of India (AAI) (13%), and the Government of Telangana (13%). GHIAL has a 30-year concession for the development, maintenance, and operation of the Shamshabad airport, which was extended for another 30 years. The airport was constructed at a total cost of Rs. 2,920 crores, with an initial handling capacity of 12 million passengers per annum. The company recently increased its capacity to 34 million in 2024. We derive comfort from the long asset life, strong sponsor with experience in the sector, expected growth in traffic and tariff, satisfactory financial performance along with the strong operational track record.

Clean Max Enviro Energy Solutions Limited

Rated AA by CRISIL, AA- by CARE

CleanMax Enviro Energy Solutions is India's largest commercial and industrial (C&I) renewable energy provider. Incorporated in 2010 and headquartered in Mumbai, it has a 15-year operating history and supplies renewable power, energy services and carbon-credit solutions to two customer groups: datacentre, AI and technology companies, and conventional C&I enterprises spanning cement, steel, industrial manufacturing, FMCG, pharmaceuticals, real estate and global capability centres. As of 30 June 2026, CleanMax's total portfolio was about 12.9 GW, spanning four stages of maturity: 4.1 GW operational (commissioned), 2.7 GW contracted but yet to be executed, 3.4 GW at advance stage (evacuation approval received) and 2.7 GW under development (evacuation approval applied for). By technology, the portfolio is 7.7 GW solar and 5.1 GW wind. It operates across 23 Indian states and internationally in the UAE, Bahrain and Thailand, and ranks first in C&I by operational capacity. The company pioneered the opex (energy-sale) model for corporate green power in India, allowing customers to buy renewable electricity with no upfront capital rather than build their own plants. We derive comfort from satisfactory operational performance of the company with growing portfolio, strong execution track record of projects, presence of strong and experienced promoters, diversified portfolio of assets with long term lives.

DMI Finance Private Limited

Rated - ICRA AA / A1+

DFPL, incorporated in 2008, is a financial services company registered as a non-banking financial company (NBFC) with the Reserve Bank of India (RBI). DMI Finance started as a wholesale lending book in primarily into real estate assets but over the course it added retail into the mix and currently it's a digital-only retail lending business. DMI Finance offers products such as consumption loans, personal loans and MSME Loans. This is a completely digital technology-driven business with API-based origination, underwriting and loan management systems. Herein, DFPL predominantly works through front-end partnerships with original equipment manufacturers (OEMs), telecom players, payment companies and technology-driven aggregators and fintech companies. We derive comfort from the company's improving asset quality, healthy capitalisation and strong underwriting practices

Muthoot Housing Finance Co ltd

Rated CRISIL AA- / A1+

Muthoot Housing Finance is part of the Muthoot Pappachan group and a subsidiary of the group's flagship company, Muthoot Fincorp Limited (MFL). MHFCL was incorporated in March 2010 and commenced operations in July 2011. It's in the business of lending affordable HL and LAP loans with average ticket size of 10-15 lacs to customers with income of Rs 15,000-30,000 per month for purchase, construction, extension of house and other mortgage loans. AUM of the company as on Jun26 was Rs 3,388 Cr split between HL 66% and LAP 34% compared to Mar26 Aum of Rs 3,254 Cr and Mar25 AUM of Rs 2,557 Cr. It has presence in 11 states and UTs and operates through 161 branches as on Jun26. The MFL group has a presence in diverse businesses such as loans against gold, vehicle finance, microfinance, money transfer, mutual fund distribution, hospitality, real estate and power generation. MFL is the flagship company of the MPG. We derive comfort from strong promoter pedigree, experienced management, prudent underwriting practices and completely secure and retail nature of the book

Redington Limited

Rated AA+/A1+ by CRISIL and ICRA

Redington Limited (REDIL), established in 1993, is a leading distributor (8th largest globally) and provider of supply chain management solutions for IT products (personal computers (PC), PC building blocks, networking, software, cloud, security and enterprise solution products) as well as consumer and lifestyle products (telecom, digital lifestyle products, entertainment products and digital printing machines) of over 400 brands in India, West Asia, Turkey, Africa, Singapore and South Asia. While distribution of IT and mobility products accounts for a bulk of its revenue, REDIL is enhancing its presence in the cloud solutions space and logistics business in India and the Gulf region. We derive comfort from strong business risk profile of REDIL, backed by its solid and established market position in the information technology (IT) and mobility products distribution business, improving product and geographical diversification in revenue from the domestic and international markets, and strong risk management practices, along with company's healthy financial risk profile and strong liquidity

Gabriel India Limited

Rated : AA+ (Stable) by CRISIL

Established in 1961, Gabriel, the flagship automotive company of the Anand group, has evolved from a leading suspension component manufacturer into a diversified automotive components platform. Following the consolidation of the group's automotive businesses and strategic partnerships, Gabriel now has presence across ride control systems, sunroofs, driveline products, body-in-white and NVH solutions, automotive fluids and lubricants, synchroniser rings, aluminium forgings and automotive fastening solutions. As part of Gabriel's strategic inorganic growth journey, the company acquired 28.9% stake in HL Mando Anand from a promoter company for ~ Rs 2,231 Cr and acquired 30% stake in HL Klemove India from HL Klemove Corporation, Korea for ~Rs 935.2 Cr. We take comfort from stable balance sheet, good track record of profitability and cash flow generation, strong promoter group with strategic partnerships and JVs with top global auto ancillary players and strong market share in the suspension market

Performance as on September 30,2026

B:Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.

The performance of the equity scheme is benchmarked to the Total Return variant of the Index.

Different plans shall have a different expense structure. The performance details provided herein are of Growth Plan (Regular Plan), except for Nippon India ETF Liquid BeES, where the performance provided are of Daily Dividend Re-investment Plan. For Exchange Traded Funds of Nippon India Mutual Fund, performance is provided at Scheme level using Dividend Reinvestment NAV's, since there are no separate plan/option under such Schemes.

Period for which scheme's performance has been provided is computed basis last day of the month-end preceding the date of advertisement.
Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment. Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year,3 years, 5 years and since inception. Further(wherever applicable), Returns for 7 days, 15 days and 30 days are computed on a simple annualized basis.Dividends(if any) are assumed to be reinvested at the prevailing NAV.In case of LIQUIDBEES,returns are based on gross dividend per unit declared by the Fund.Bonus(if any) declared has been adjusted. Performance of dividend option would be Net of Dividend distribution tax, if any.Face value of scheme is ₹10 / -per unit.Face Value ofNippon India Low Duration Fund is ₹1000 / -per unit.Face Value of Nippon India Money Market Fund, Nippon India Liquid Fund & amp; Nippon India Ultra Short Duration Fund is ₹1000 / -per unit w.e.f 5th Aug 2012.Face value of Nippon India ETF Junior BeESis ₹1.25 per unit. Face value of Nippon India ETF Liquid BeES is ₹1000.Face value of Nippon India Overnight Fund is ₹100 per unit. Face Value of Nippon India ETF Nifty BeES, Nippon India ETF Bank BeES, Nippon India ETF PSU Bank BeES, NipponIndia ETF NV20, Nippon India ETF Hang Seng BeES has changed from ₹10 / -per unit to ₹1 / -per unit.w.e.f 20th Dec 2019.Face value of Nippon India ETF Gold BeES has changed from ₹100 / -per unit to ₹1 / -per unit w.e.f 20th Dec 2019.In case, thestart / end date of the concerned period is non - business day(NBD), the NAV of the previous date is considered for computation of returns.Schemes which have not completed one year, performance details for the same are not provided.Performancedetails of closed ended schemes are not provided since these are not comparable with other schemes.

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other Investment. Dividends (if any) are assumed to be reinvested at the prevailing NAV. In case of LIQUIDBEES, returns are based on gross dividend per unit declared by the Fund. Bonus (if any) declared has been adjusted. Performance of dividend option would be Net of Dividend distribution tax, if any. The performance of the equity scheme is benchmarked to the Total Return variant of the Index. Face value of scheme is ₹10/- per unit. Face Value of Nippon India Low Duration Fund is ₹1000/- per unit. Face Value of Nippon India Money Market Fund, Nippon India Liquid Fund & Nippon India Ultra Short Duration Fund is ₹1000/- per unit w.e.f 5th Aug 2012. Face value of Nippon India ETF Junior BeES is ₹1.25/- per unit. Face value of Nippon India ETF Liquid BeES is ₹1000/- per unit. Face value of Nippon India Overnight Fund is ₹100/- per unit. Face Value of Nippon India ETF Nifty BeES, Nippon India ETF Bank BeES, Nippon India ETF PSU Bank BeES, Nippon India ETF NV20, Nippon India ETF Hang Seng BeES has changed from ₹10/- per unit to ₹1/- per unit. w.e.f 20th Dec 2019. Face value of Nippon India ETF Gold BeES has changed from ₹100/- per unit to ₹1/- per unit w.e.f 20th Dec 2019. In case, the start/end date of the concerned period is non-business day (NBD), the NAV of the previous date is considered for computation of returns. Schemes which have not completed one year, performance details for the same are not provided. Performance details of closed ended schemes are not provided since these are not comparable with other schemes.

The performance of the equity scheme/s are benchmarked to the Total Return variant of the Index.
NA has been mentioned for scheme in existence for more than 1 year but less than 3 years or 5 years or instances where benchmark data for corresponding period is not available.
(4)The Scheme Returns are inclusive of the impact of Segregation of portfolio in the respective schemes. For impact on NAV on account of Segregation of portfolio, please refer SID/KIM of the relevant Schemes and detailed Performance of the respective schemes in this doccument.

Exit Load – If charged, the same shall be credited to the scheme immediately net of Goods & Service Tax, if any.

Exit load levied on the Units redeemed will be the rate prevailing at the time of the allotment of the Units. For Special products registrations, load for each transaction is based on the load structure applicable as on the registration date.

^Base Expense Ratio (BER): As on last day of the month, disclosed in accordance with Regulation 66(7) of SEBI (Mutual Funds) Regulations, 2026. BER denotes annualized asset management and other operational fees. Transaction brokerages, regulatory fees, and statutory taxes (including GST, STT, and Stamp Duty) are charged separately to the scheme on an actual's basis; they are not included in the Base Expense Ratio percentage displayed above. The stated BER should not be equated with the historical or comprehensive Total Expense Ratio (TER). **The Final TER is available in Annexure 1 on page 368**, you can find the full break down under the 'Investor Services' section of our official website at https://mf.nipponindiaim.com/investor-services/downloads/total-expense-ratio-of-mutual-fund-schemes

1. Base Expense Ratio as per Regulation 66(7) of SEBI (Mutual Funds) Regulations, 2026.
2. Brokerage Cost as per Regulation 66(9) of SEBI (Mutual Funds) Regulations, 2026.
3. Transaction cost incurred for the purpose of execution of trade as referred under Regulation 66(10) of SEBI (Mutual Funds) Regulations, 2026.
4. Present GST rate is 18 %.
5. Percentages mentioned above are annualized.
6. Base TER of direct plan shall have a lower expense ratio excluding distribution expenses, commission, etc., and no commission shall be paid from such plans

@Tracking Error – 1 year Annualised Tracking Error based on daily returns. For the schemes which are yet to complete 1 year, Annualised Tracking Error is based on the data available.

@@ Creation Unit Size - W.e.f May 1, 2023, the execution value for large investors must be greater than Rs.25 crores (except for Schemes managed by Employee Provident Fund Organisation (EPFO), India and Recognized Provident Funds, Approved Gratuity Funds and Approved Superannuation Funds under Income Tax Act, 1961)

Withholding Tax on distributed income by Mutual Fund Scheme: The Finance Act, 2020 has abolished dividend distribution tax on Income distribution by Mutual Fund scheme. W.e.f. 01.04.2020 any income distribution by Mutual fund scheme is taxable in the hands of investor and mutual fund scheme is required to withhold tax on such income distribution as per applicable tax rate.

Applicability of Stamp Duty on Mutual Fund Transactions: Stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund transactions, with effect from July 01, 2020. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase/switch-in transactions (including IDCW reinvestment) to the unitholders would be reduced to that extent. Kindly refer notice cum addendum no. 30, dated June 30, 2020.
